

**Subject: Recommendation Letter for Mr. Sajjad Ahmad**

**To the Admissions Committee,**

It gives me great pleasure to write this letter in strong support of **Sajjad Ahmad**, whom I have known for the past year. I am **Dr. Salman Afsar Awan**, Lecturer in the Department of Computer Science at the University of Agriculture, Faisalabad, where I teach undergraduate- and graduate-level courses in computing. I had the opportunity to teach Sajjad in *Web Programming (CS-517)*, a course that emphasizes modern web technologies, system design, and practical implementation. Through this course, I was able to closely observe his technical ability, learning discipline, and approach to problem-solving.

Throughout the semester, Sajjad showed a solid grasp of web development fundamentals and applied HTML, CSS, and JavaScript effectively in his work. He was punctual with submissions and often went beyond the course requirements. For his final project, he built a complete, responsive web application with an integrated AI-based chatbot, which clearly stood out from the more basic projects submitted by other students.

Based on my experience teaching him, Sajjad is a capable and motivated student with strong technical foundations and a responsible work ethic. These qualities prepare him well for advanced academic study. I recommend him for admission to your graduate program and believe he would contribute positively to an academic environment.

**Sincerely,**

**Dr. Salman Afsar Awan**

Lecturer
