

**Dear Admissions Committee,**

I strongly recommend Waqad, who completed his BS in Computer Science at COMSATS University Islamabad (CUI), Vehari Campus. I am currently a Postdoctoral Researcher at the University of Electronic Science and Technology of China and previously served as an Assistant Professor at CUI, Vehari Campus. In this capacity, I taught the course Electricity, Magnetism and Optics to Waqad during the Spring 2019 semester.

Waqad demonstrated exceptional aptitude in Electricity, Magnetism and Optics by earning an A, the highest possible grade. His written assignments and problem sets were consistently precise and conceptually rigorous, reflecting a strong focus and a meticulous approach to complex physical and mathematical concepts. Among the students I have taught in this course, Waqad consistently ranked in the top 5% in terms of comprehension, engagement, and analytical ability. He never hesitated to ask thoughtful questions and clarifications when needed, highlighting intellectual curiosity and engagement. In addition, he assisted me in preparing extensive lecture notes to facilitate student understanding by carefully translating complex theoretical concepts into clear, well-structured, and visually accessible formats that made the material easier to grasp for his peers. This clearly demonstrated his analytical ability, attention to detail, and exceptional presentation skills.

Waqad served as an unofficial Teaching Assistant in my class by explaining the previous lecture material to the class at the start of every lecture. This not only reflected his deep understanding of the subject but also his excellent communication skills. He also clarified any doubts the students had in the lecture with detailed, precise answers. He took this responsibility proactively, without any formal assignment, demonstrating initiative and leadership. His efforts significantly helped his peers grasp difficult concepts more quickly and reinforced a collaborative learning environment, while also encouraging students to feel more comfortable asking questions they might hesitate to ask me. These qualities reflect his ability to work with peers, consistent dedication, communication skills, and readiness for advanced, independent, and collaborative studies.

Based on my experience teaching Waqad and observing his approach to complex topics and problem-solving, characterized by genuine curiosity and sustained interest, I strongly believe that he would be a valuable addition to any graduate program to which he applies. I am confident that he possesses the intellectual maturity, discipline, and motivation to contribute meaningfully to research from the early stage of his graduate studies.
