RECOMMENDATION LETTER

To the Graduate Admission Committee,
 University of name ,

It is my pleasure to recommend Jaweria Siddique for admission to the PhD program in Information Technology at the University of [..].I have known Jaweria for several years as her instructor for *Programming Fundamentals* and *Object-Oriented Programming* courses at Bahauddin Zakariya University, during which she consistently demonstrated academic excellence, diligence, and a strong commitment to learning.

By way of background, I am currently serving as an Assistant Professor of Computer Science at Bahauddin Zakariya University. My research focuses on developing advanced computing technologies, particularly in the domains of machine learning, artificial intelligence, and data-driven systems. I have published over 40 peer-reviewed research papers, which have collectively received more than 4000 citations, and I completed my PhD in Computer Science in Malaysia.

Jaweria has consistently impressed me with her sharp analytical thinking and strong programming abilities. In my *Programming Fundamentals* course, she demonstrated excellent problem-solving skills, completing complex coding assignments that required efficient algorithmic design. Later, in *Object-Oriented Programming*, she exhibited deep conceptual understanding by developing projects such as a Library Management System and a Student Record Portal using Python and SQL. Both projects demonstrated her strong conceptual understanding and ability to turn ideas into functional solutions.

What truly distinguishes Jaweria is her curiosity and dedication to continuous learning. She frequently explored topics beyond the syllabus, engaging in coding challenges, online programming contests. These efforts reflect her creativity, discipline, and readiness for research.

With her solid academic foundation and strong technical aptitude, I am confident that Jaweria Siddique will be an asset to your PhD program. I recommend her wholeheartedly for admission to the PhD in Information Technology at the University of [].

Please feel free to contact me for any further details.

Sincerely,
Dr. Name
Assistant Professor, Department of Information Technology
